### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ashish Patel on January 11, 2011.

The application has been amended as follows:

Claim 1 (Currently Amended) An apparatus for providing separable billing services, comprising:

a mobile communications terminal (MCT) operatively connectable with one or more digital processing devices via a satellite communications system;

a memory operatively connectable to the MCT for storing a set of identifiers that identify the digital processing devices in the satellite communications system wherein each identifier in the set of identifiers is assigned a communication type;

wherein the first type of communication comprises a business-type communication and a second type of communication comprises a personal-type communication; and

a processor operatively connectable to the MCT for receiving a data packet that includes a source address identifying an originator of the data packet, comparing the source address to the set of identifiers to find a matching identifier, determining an

assigned communication type assigned to the matching identifier, wherein the communication type includes at least one of a first type of communication or a second type of communication, and adjusting at least one of a first account or a second account associated with the MCT based on the assigned communication type.

Claim 3 (Cancelled)

Claim 7 (Cancelled)

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Regarding Independent Claims 1, 10 and 18

The most remarkable prior arts on record are to Prange (PG PUB. 2005/0086138) and Wolfe et al. (PG PUB. 2003/0083913). Prange is directed to a method of billing a conversation carried out by a user of a mobile radio terminal using said mobile radio terminal and a mobile radio network. *Prange, Abstract.* Wolfe et al., is directed to a method and apparatus for allowing a service provider to receive communications from a third party service provider while services are being performed by the third party service provider. *Wolfe et al., pg.2, ¶ [0011].*

Prange nor Wolfe et al. teach the structural limitations of the claimed invention, of a memory operatively connectable to the MCT for storing a set of identifiers that identify the digital processing devices in the satellite communications system wherein each identifier in the set of identifiers is assigned a communication type. Moreover, none of the prior art of record remedies the deficiencies found in Prange and Wolfe et al. or could be combined with any other reference to produce the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Terminal Disclaimer***

The terminal disclaimer filed on January 13, 2011 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application 10/138,911 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Drawings***

The drawings were received on May 30, 2008. These drawings are sufficient.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kelly, U.S. Patent Granted Publication 2002/0042715, April 11, 2002, discusses a mobile call detail record separation for billing purposes.

Coffee et al. U.S. Patent Granted Publication 2004/0039504, February 26, 2004, discusses a vehicle tracking, communication and fleet management system.
